

GOBL Whitepaper

About GOBL

GOBL is a decentralized community-driven memecoin born from the spirit of survival and legend.

The Goblin Goose is not just a mascot — it's the soul of a crypto revolution.

Our mission is to create a meme-powered movement fueled by transparency, security, and unstoppable community energy.

GOBL Tokenomics

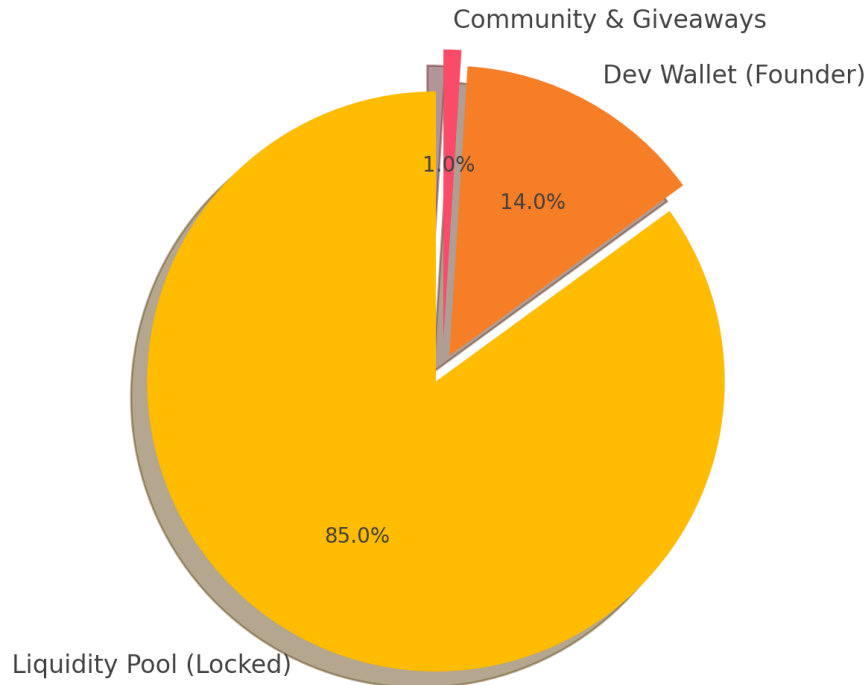

Allocation	Amount
Developer Wallet	14% (Locked for project operations)
Community Allocation	85% (Liquidity and future ecosystem use)
Community Giveaways & Rewards	1%

Launch Strategy

- At launch, GOBL will pair an initial portion of its supply (~1 billion GOBL tokens) to SOL to form the first liquidity pool.
- The remaining 2.655 billion GOBL tokens from the community allocation will be securely locked for future strategic use:
 - Future liquidity strengthening
 - Long-term holder rewards
 - Ecosystem expansion

This method ensures early price discovery, low initial supply pressure, and sustainable community growth

GOBL Tokenomics — Total Supply: 4.3 Billion GOBL

Security Measures

- Mint Authority Revoked
- Freeze Authority Revoked
- Transparent Developer Wallet
- Public Liquidity Lock Proof
- Token Lock for Long-Term Security
